- Supports Operating System 10.8 and above.
- Supports recovery of Contacts, Messages, Call History, Calendar, Notes, Reminders and Safari Bookmarks from your iOS device.

Installation Procedure

Before installing the software, check that your computer meets the minimum system requirements:

Minimum System Requirements:

Processor: Intel Processors

Operating System: Mac OS X 10.8 and above

Memory: 1 GB RAM

iPhone: iPhone 8 / 7 / 7s / 6 Plus / 6 / 5s / 5c / 5 / 4s / 4

Hard Disc: 100 MB free space

Note: Please download the latest version of iTunes before running **Stellar Phoenix Data Recovery for iPhone**.

To install the software, follow these steps:

1. Unpack **StellarPhoenixDataRecoveryforiPhone.dmg.zip** file.
2. Decompressing the zip file and double-click the **.dmg** file. This step mounts a virtual volume - **StellarPhoenixDataRecoveryforiPhone**.
3. Double-click **StellarPhoenixDataRecoveryforiPhone** volume to open the **StellarPhoenixDataRecoveryforiPhone** application window.
4. Drag the **StellarPhoenixDataRecoveryforiPhone** file to the **Applications** folder.
5. To launch the software, double-click on the **StellarPhoenixDataRecoveryforiPhone** file in the **Applications** folder.
6. **License Agreement** screen gets displayed. If the user accepts the **License Agreement**, then the software is launched; otherwise, it terminates.

To remove the software, drag and drop the **StellarPhoenixDataRecoveryforiPhone** file from the **Applications** folder to **Trash**.

Launching the Software

Follow any of the following methods to run **Stellar Phoenix Data Recovery for iPhone** on a Mac system:

- Double click on the **Stellar Phoenix Data Recovery for iPhone** file in the **Applications** folder.
- Double-click on the **Stellar Phoenix Data Recovery for iPhone** desktop shortcut.
- Click on the **Stellar Phoenix Data Recovery for iPhone** icon in the dock.

Ordering the Software

To know more about **Stellar Phoenix Data Recovery for iPhone**, click <https://www.stellarinfo.com/media-tools/iphone-data-recovery.php>

To purchase the software online, please visit <https://www.stellarinfo.com/media-tools/ios-data-recovery/buy-now.php>

Select either of the methods given above to purchase the software.

Once the order is confirmed, you receive a registration key through e-mail. You require this key to activate the software.

Registering the Software

The demo version is just for evaluation purpose and must be eventually registered to use the full functionality of the software. The software can be registered using the Registration Key which you receive via email after purchasing the software.

To register the software:

1. Run the demo version of **Stellar Phoenix Data Recovery for iPhone** software.
2. On the main user interface, click the **Register** option. The **Register** window is displayed as shown below:

The screenshot shows a window titled "Register". Inside the window, there is a text prompt "Enter registration key to register and activate the product." next to a circular icon containing a person silhouette. Below this is a text input field. To the right of the input field are two buttons: "Register" and "Cancel". Below the input field, there is a note "The registration key will be in your email." At the bottom of the window, there is a link "I don't have a Registration Key" followed by a blue button labeled "Get it now".

3. If you don't have the registration key, click the **Get it now** button in the window to go online and purchase the product.
4. Once the order is confirmed, a **Registration Key** will be sent to the email provided.
5. Type the **Registration Key** (received through email after purchasing the product) and click **Register** button (Please ensure that you have an active Internet connection).
6. The software will automatically communicate with the license server to verify the entered key. If the key you entered is valid, the software will be registered successfully.
7. The ' **Activation Completed Successfully** ' message is displayed after the process is completed successfully. Click **OK**.

Updating the Software

There are periodic software updates for **Stellar Phoenix Data Recovery for iPhone**. The software updates should be done to keep the software up-to-date. The updates can be a newly added functionality, a new feature, a new service or any other information that can be important for improvement. The update option in the application is capable of checking for the latest updates. It checks the both latest minor and major versions available online. You can easily download minor versions through the update wizard. However, the major version, if available, has to be purchased. While updating the software, it is recommended to close all running programs. Note that the demo version cannot be updated.

Click on **Update**  button on the main user interface to update the software.

Add Backup

Click this button to add the backup file from your system for the process of recovery.

Download and Scan

Click this button to scan and download the iCloud backup files.

Delete Downloaded Backup

Click this button to delete the backup file.

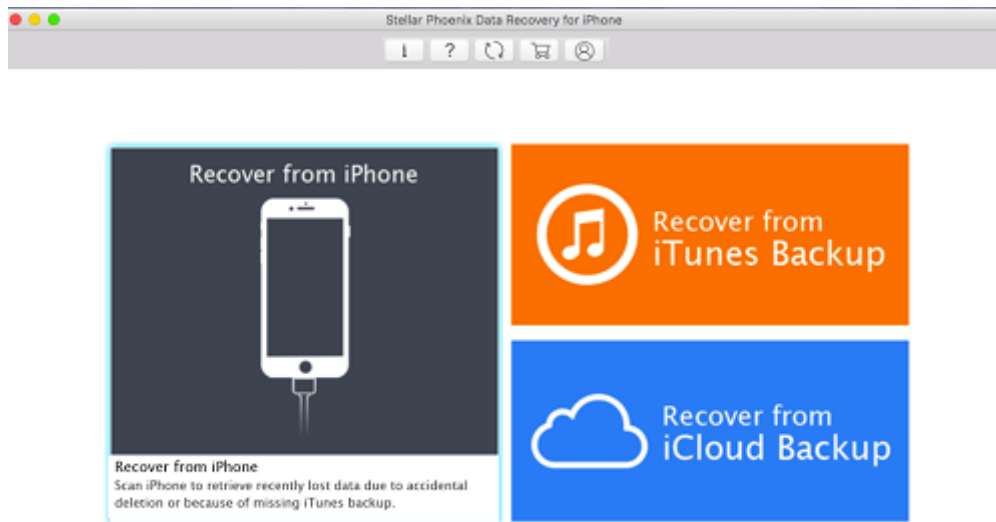

Recover from iPhone

You can use the **Recover from iPhone** option to scan your iOS device and recover data (like contacts, messages, reminders, calendars, notes) from it. This option scans the iOS device directly to find data that was recently deleted or lost.

Note: Install iTunes before you use **Stellar Phoenix Data Recovery for iPhone** software. iTunes services should be running while you are scanning/analyzing an iOS device.

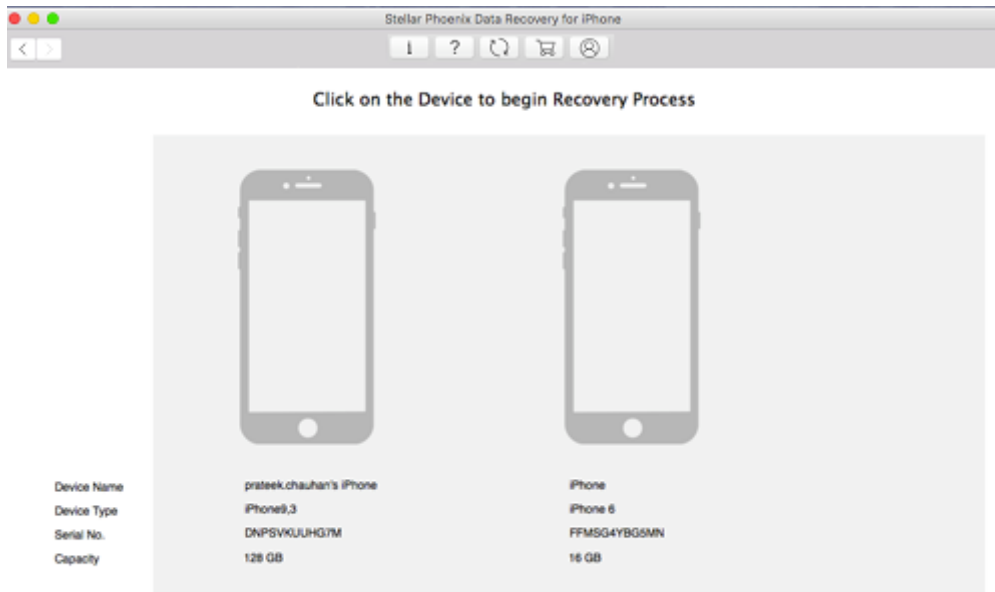

To use the **Scan Device** option of the software, follow the steps given below:

1. Plug your iOS device into your computer. Run **Stellar Phoenix Data Recovery for iPhone**.

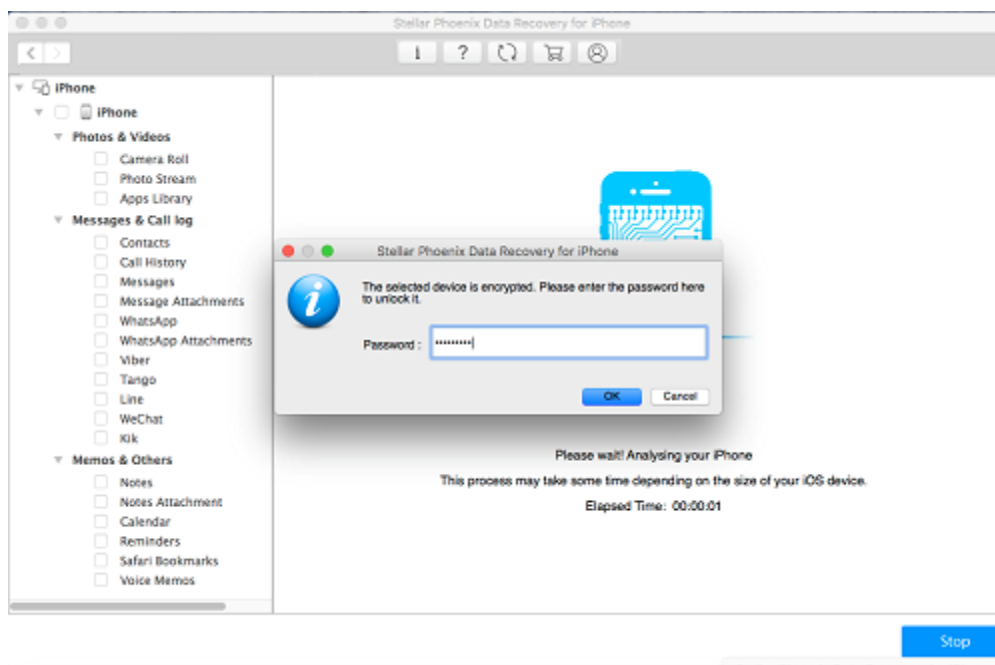

Note: After you connect the device, a Trust/Untrust dialog prompts in your device. You need to Trust a computer to enable sync and data transfer between the iPhone/iPad and the computer. If you tap on "Don't Trust", iTunes is not able to recognize your device at all.

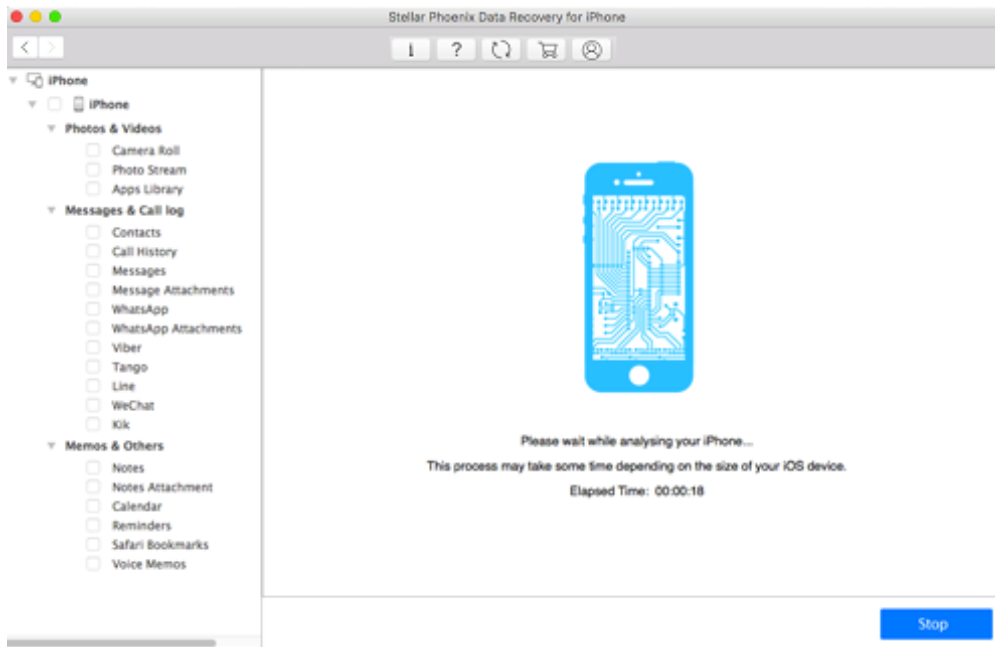

2. On the **Stellar Phoenix Data Recovery for iPhone** main screen, select the **Recover from iPhone** option.
3. The application starts analyzing the device you have connected. In case you have connected multiple devices, the application lists Device Name, Device Type and Serial Number of the connected devices. Select the desired device from which you want to recover the data.

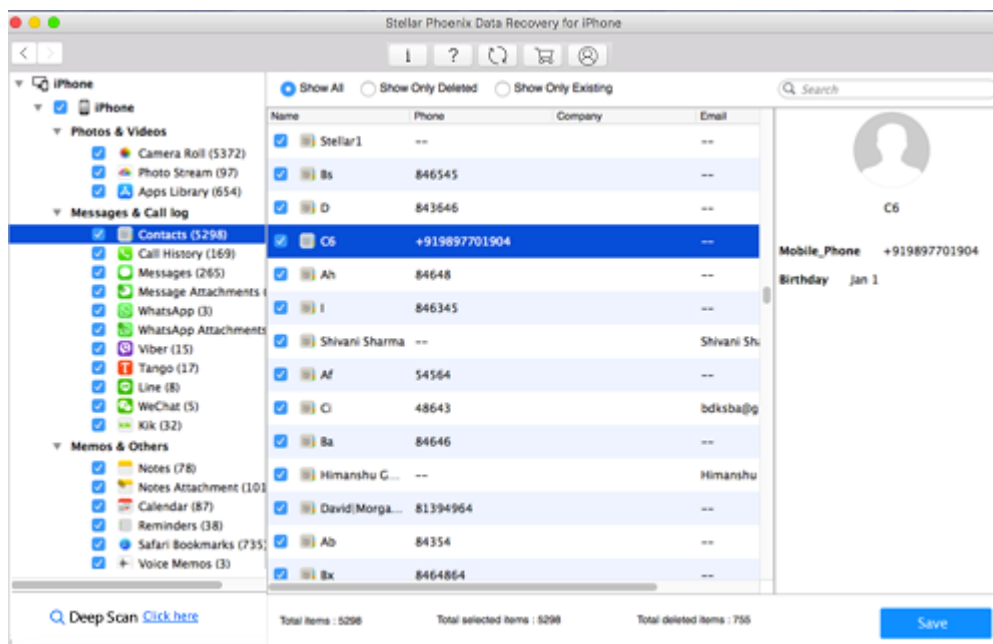

- If your iPhone is encrypted, a dialog box will open prompting you to enter the password. Enter the password and click **OK**.

- The application starts analyzing the device you have connected.

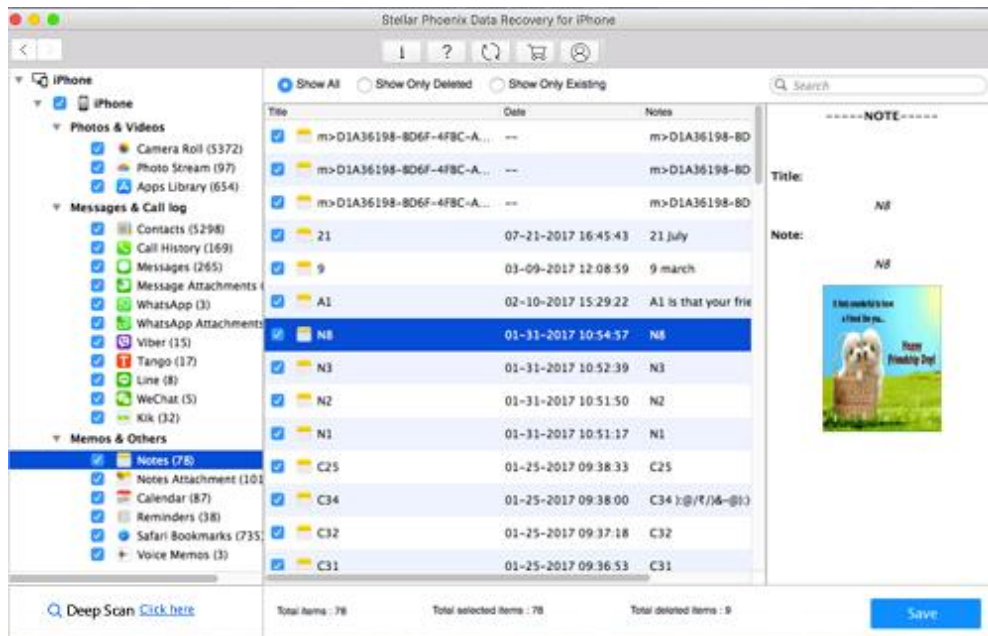

6. After successful analysis, the application starts scanning for contents of the device.

7. You can now preview and save data. Following file types are supported: Camera Roll, Photo Stream, Contacts, Messages, Message Attachments, Call history, Calendar, Notes, Notes Attachments, Voice Memo, Reminder, Safari Bookmarks, WhatsApp, WhatsApp Attachments, Viber, Tango, WeChat, Line, Kik and Apps Library. From the left-hand side tree view, click the

supported file type under the listed iOS device and all items under the selected supporting type head are listed.

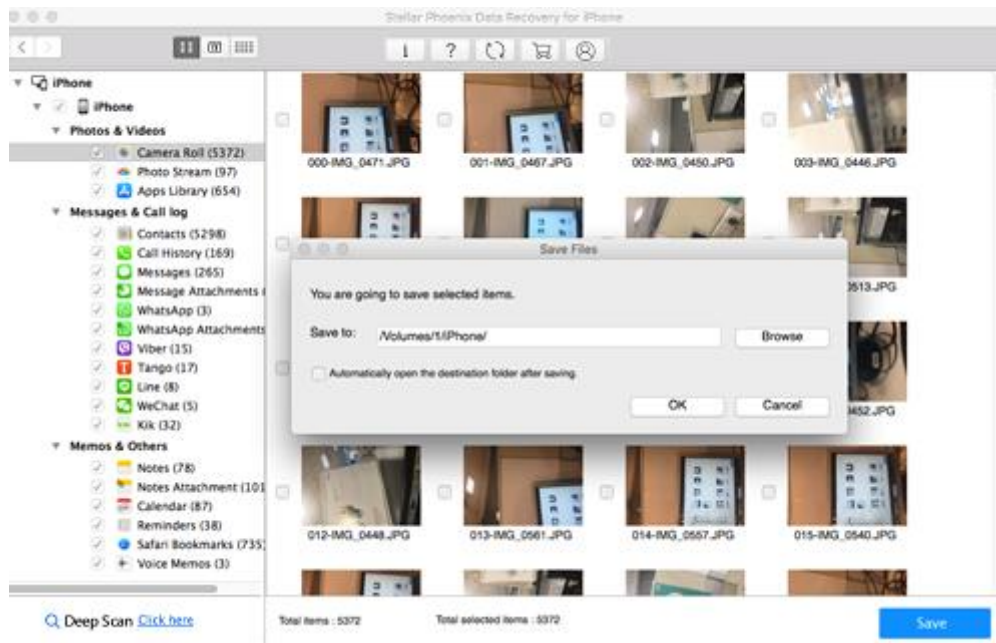

Note: All deleted items are listed in red whereas all others are black.

8. You can either select all or a few items (by selecting the checkboxes in front of them).

Note:

- You can preview the existing and deleted items, and you can also search for a specific item by typing a keyword in the search box.
- Click **Deep Scan** if your desired data is not included in the list.

9. Click **Save** to confirm it. The **Save Files** dialog appears as shown below.

10. Select the **Save to Computer** option if you want to save the recovered files to your computer. Click **Browse** and select a destination for saving the recovered files and click **OK**.

11. Or, select the **Save to iPhone** option if you want to save the recovered files to your device. From the drop down box select the desired device to which you want to save the recovered files and click **OK**.

Note: You cannot recover deleted items from Camera Rolls, Photo Streams, Apps Library, Attachments and Voice Memos.

Recover from iTunes Backup

You can scan an iTunes backup file for data if you have synchronized your iOS device with iTunes earlier. Scanning backup file is helpful in case you have lost your data. You can then recover the lost data from iTunes backup files using **Stellar Phoenix Data Recovery for iPhone** software.

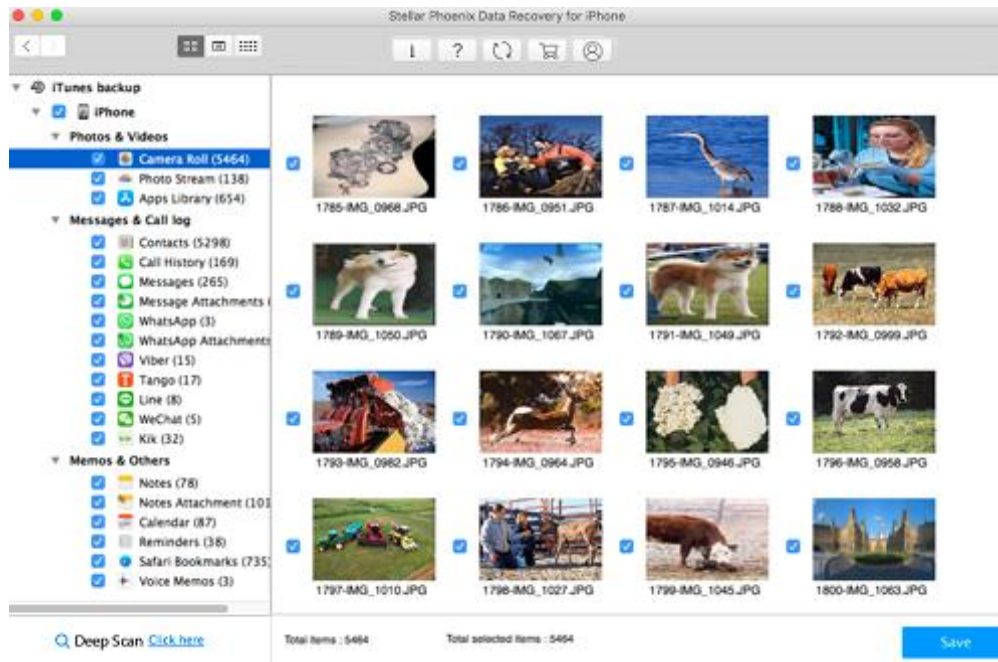

To use the **Scan Backup** option of the software, follow the steps given below:

1. Run **Stellar Phoenix Data Recovery for iPhone**. (**Note:** You do not need to connect your iOS device for recovering data from iTunes backup files)
2. On the **Stellar Phoenix Data Recovery for iPhone** main screen, select the **Recover from iTunes Backup** option.

3. The application lists all the iTunes backup files listed in your systems.

7. From the tree view, click on the supported file categories under the listed iTunes backup file which lists all items under the selected category head.
8. You can either select all or a few items (by selecting the checkboxes in front of them).

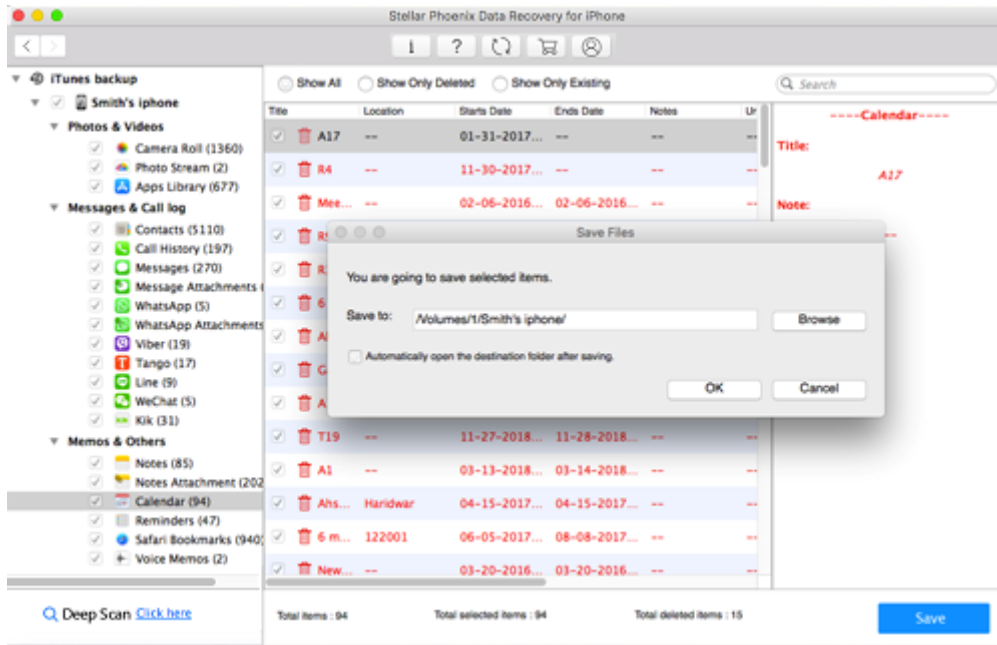

Note:

- You can preview the existing and deleted items, and you can also search for a specific item by typing a keyword in the search box.
- Click **Deep Scan** if your desired data is not included in the list.

9. Click **Save** to confirm it. Select a destination to save the data.

Note: In **Stellar Phoenix Data Recovery for iPhone** you have an option of manually adding the backup file from your system using the **Add Backup** option. You need to click **Add Backup** option and then browse to the iTunes backup location, select it and then click **OK**.

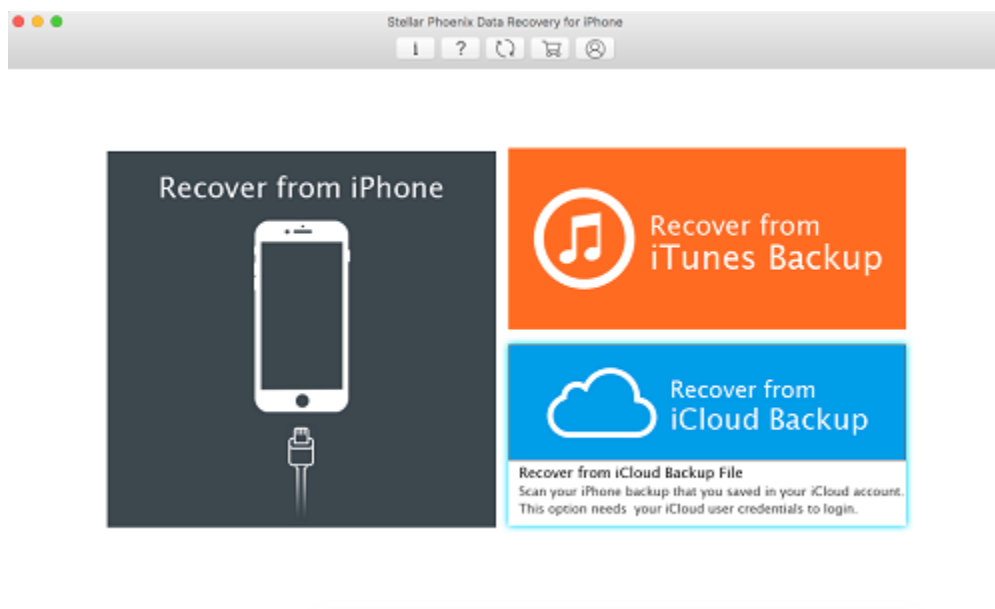

Recover from iCloud Backup

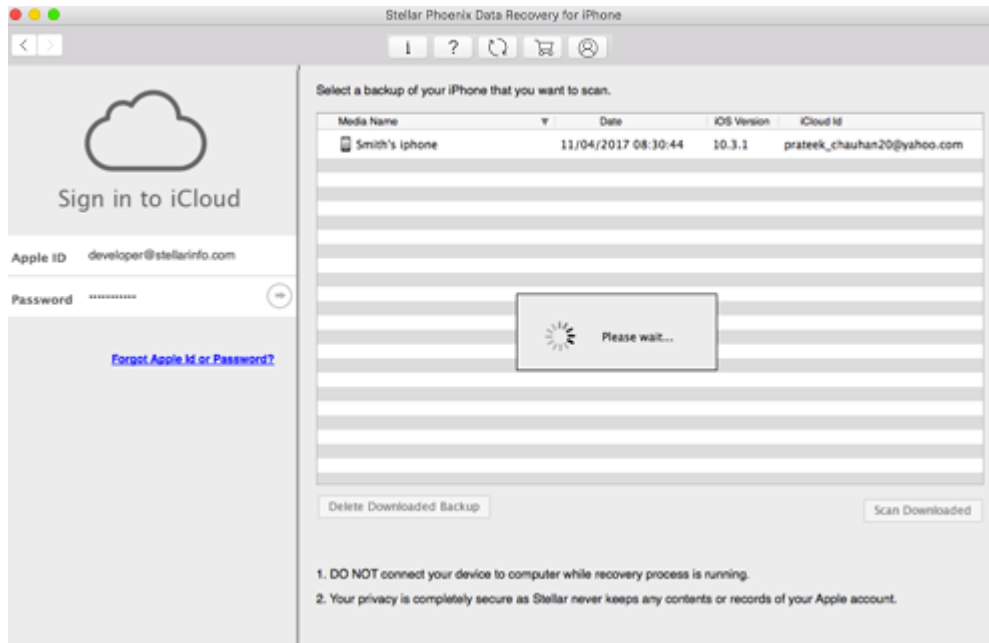

You can scan an iCloud backup file for data if you have synchronized your iOS device with iCloud earlier. To restore or recover your lost files from iCloud backup, you need **Stellar Phoenix Data Recovery for iPhone** to help you.

To use the **iCloud Backup** option of the software, follow the steps given below:

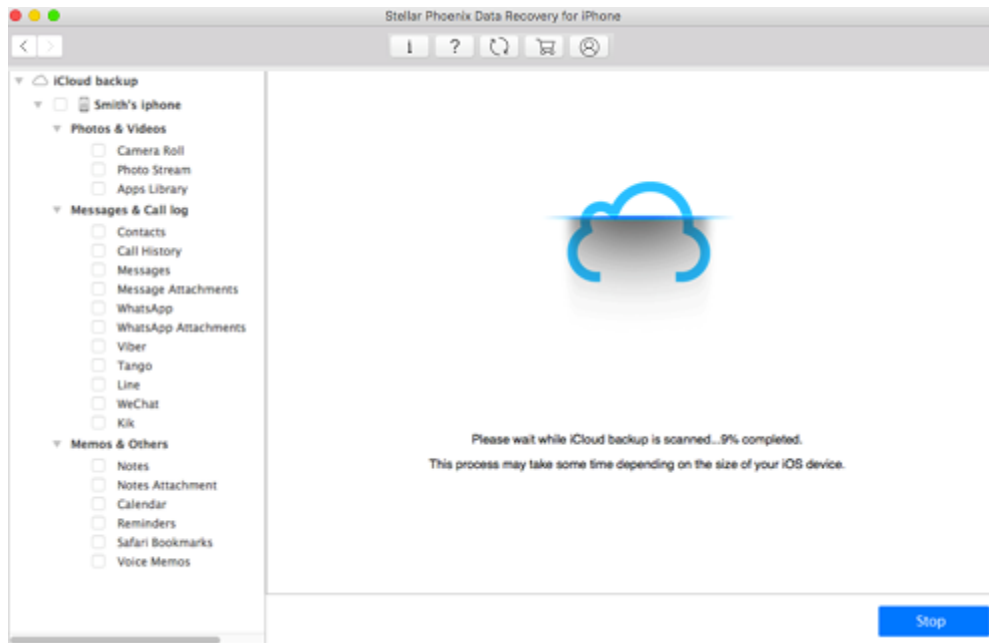

1. Run **Stellar Phoenix Data Recovery for iPhone**. (**Note:** You do not need to connect your iOS device for recovering data from iCloud backup files)
2. On the **Stellar Phoenix Data Recovery for iPhone** main screen, select the **Recover from iCloud Backup** option.

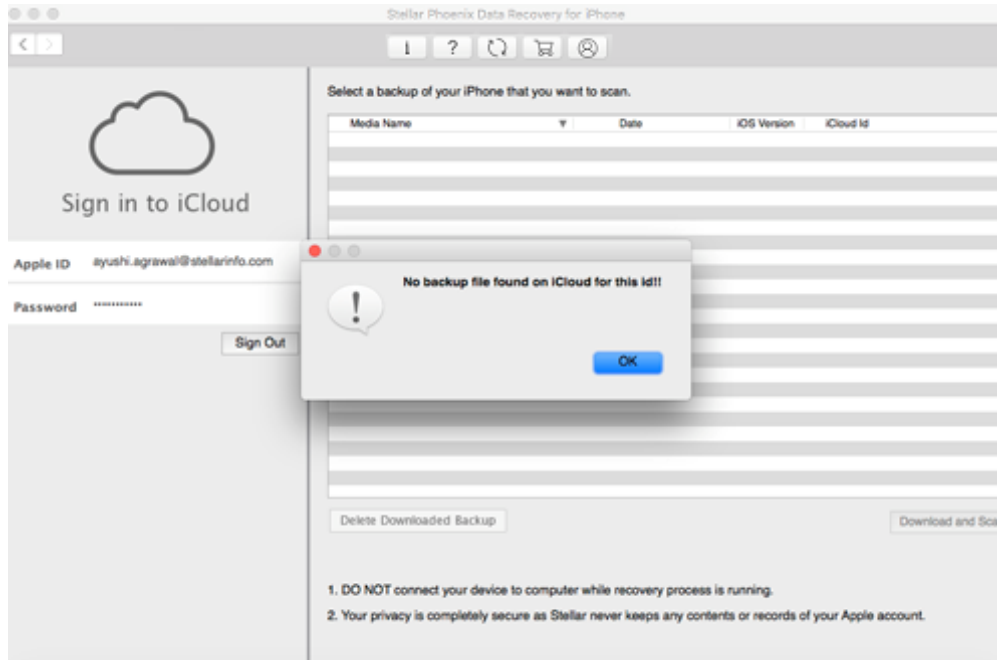

3. Enter the **Apple ID** and **Password** to get a list of all available backup files from iCloud.

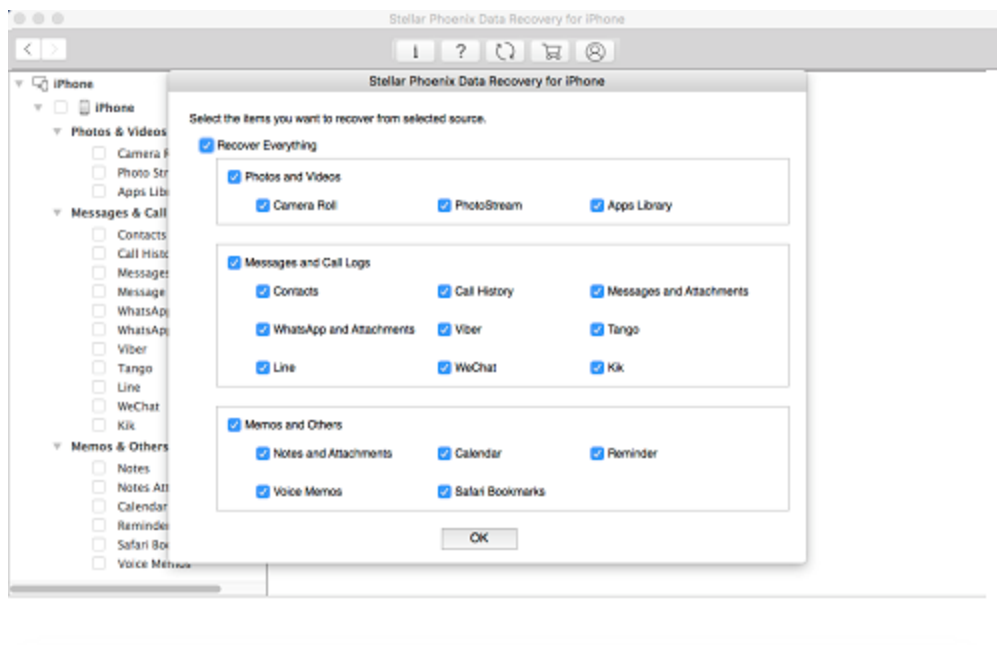

4. Scan and Download the iCloud backup files.

Note: In case you do not have any backup with the account entered, the dialog box shown below appears.

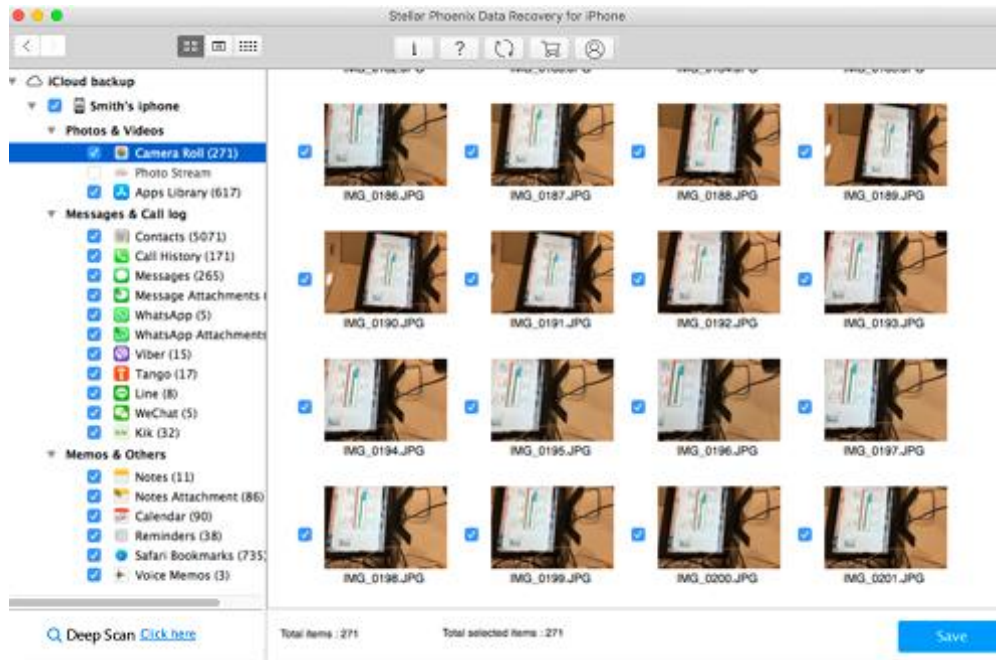

5. After successful analysis, item selection window will pop up. Select the type of data i.e. **Everything, Photos and Videos, Messages and Call Log, Memos and Others**, you want to recover.

6. Select an iCloud backup from which you want to preview and save data. You can save data from following: Camera Roll, Photo Stream, Contacts, Messages, Message Attachments, Call History,

Calendar, Notes, Notes Attachments, Reminders, Voice Memos, Safari Bookmarks, WhatsApp, WhatsApp Attachments, Viber, Tango, WeChat, Line, Kik and Apps Library.

7. From the tree view, click on the supported file categories under the listed iCloud backup file which lists all items under the selected category heading.

8. You can either select all or a few items (by selecting the checkboxes in front of them).

Note:

- You can preview the existing and deleted items, and you can also search for a specific item by typing a keyword in the search box.
- Click **Deep Scan** if your desired data is not included in the list.

9. Click **Save** to confirm it. Select a destination to save the data.

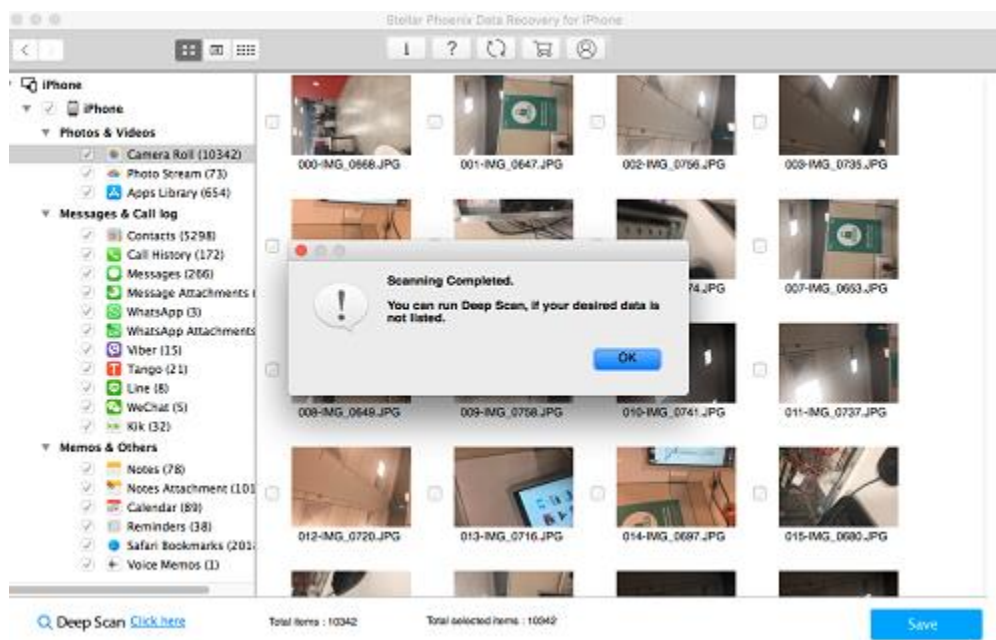

Deep Scan

Deep Scan allows you to recover data from iPhone. It does a comprehensive scan of the iOS devices and iTunes backup to recover each and every bit of lost or deleted data. It searches for lost files on the basis of file signature. This recovery option recovers everything that is found in the selected source. This option is especially helpful in case of severely deleted and corrupted iPhone data.

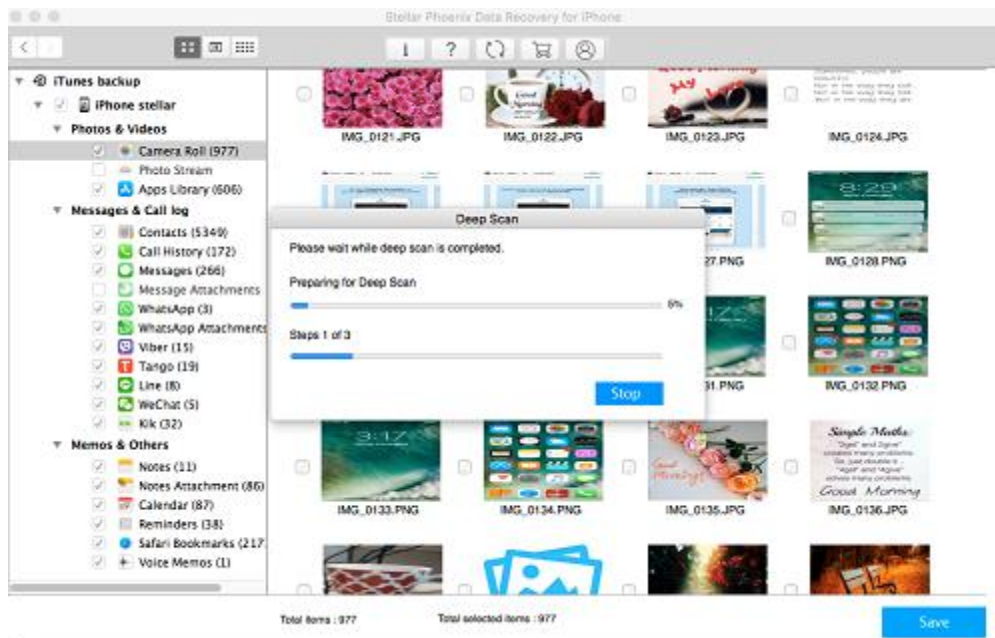

In case, after the quick scan process is completed and your desired file is not included in the list of files detected, you can opt for **Deep Scan** to perform a comprehensive scan of the selected device and backup.

To perform Deep Scan:

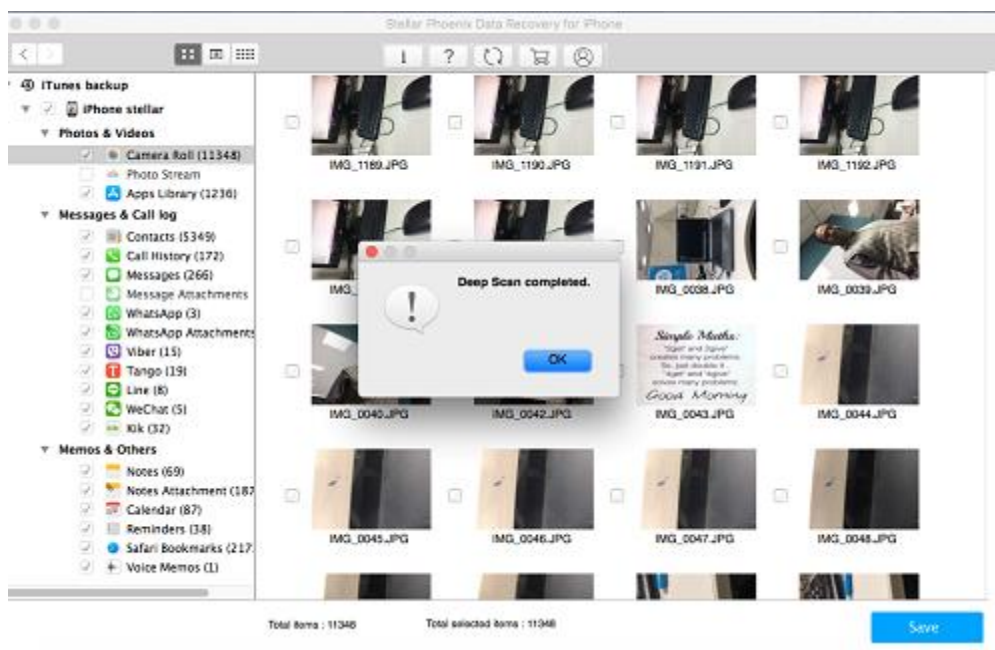

1. Once quick scan is completed, in the preview window choose **Click Here** option given at the bottom of the window to start **Deep Scan**.

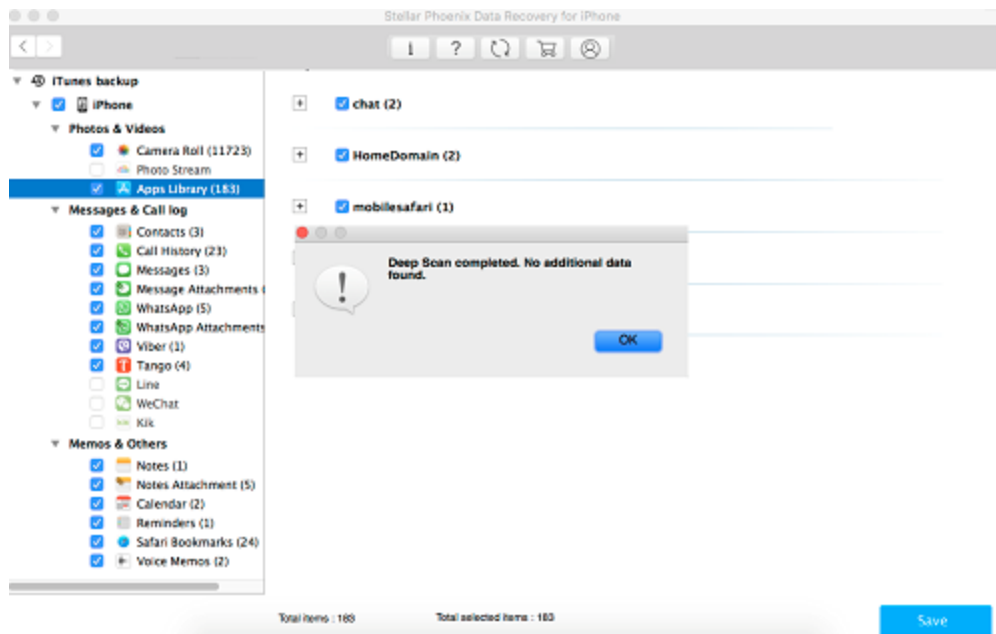

2. A screen showing the scanning process is displayed. Click **Stop** to stop the scan at any point.

- Once the scanning process is completed, a dialog box displaying the message '**Deep Scan completed**' is displayed.

- In case the additional data is not recovered through Deep Scan, a dialog box displaying the message '**Deep Scan completed. No additional data found**' is displayed.

- Files found during Deep Scan can be viewed in the preview window and saved at any desired location.

FAQs

1. Can Stellar Phoenix Data Recovery for iPhone recover all of my deleted data?

Yes, with **Stellar Phoenix Data Recovery for iPhone**, you can recover deleted Contacts, Messages, Call history, Calendar, Notes, Reminders and Safari Bookmarks from your iOS device in an efficient manner. However, the software might not be able to recover the deleted data if data deleted is overwritten by any new data.

2. Can I preview messages before recovering them?

Yes using **Stellar Phoenix Data Recovery for iPhone** software you can preview Contacts, Messages, Call history, Calendar, Notes, Reminders and Safari Bookmarks before recovering them.

3. In how many formats can I save the contacts after recovering them using Stellar Phoenix Data Recovery for iPhone software?

You can save the contact in three formats using **Stellar Phoenix Data Recovery for iPhone** software after recovering them. You can save them in VCF, CSV and HTML formats.

4. Can I synchronize my photos and contacts to my iOS device after recovering data using Stellar Phoenix Data Recovery for iPhone?

Yes, you can synchronize photos and contacts to your iOS device using iTunes.
